

David Ducamp, Consultant Pastry Chef.

Fruit jelly

Method: cook Fruit'Purée at 40°C, add the sugar (1) and the pectin. Bring to the boil, then add the sugar (2) and the glucose. Cook at the temperature indicated. Add the citric acid and bring to the boil again before pouring into moulds.

Fruit jelly

(Pre-dessert for gastronomic restaurants)

Method: cook Fruit'Purée (1) at 40°C, add the sugar (1) and the pectin. Bring to the boil, then add the sugar (2) and the glucose. Cook at the temperature indicated. Add the citric acid and bring to the boil again. Finally add Fruit'Purée (2) before pouring into moulds.

* Citric acid solution: 50% water 50% citric acid
